I would like to purchase a 2-meter integrated sampler - \$30, includes tax and shipping (see below)

Annual Cost: \$200-\$240*

*Price based on \$40 charge per sampling event/per site (5 or 6 event program).

Price Includes:

- Quality Laboratory Analysis of Total Phosphorus and Chlorophyll-a (MN Dept. of Health Certified #027-005-336)
- Online Data Storage, Tracking, Analysis & Reporting
- Training of Sample Volunteer(s)
- Instructions and Documentation
- Sampling Bottles & Preservatives
- Shipping Coolers and Supplies

Equipment not included in the price of this program include a Secchi disk and 2-meter integrated sampler.

Secchi disks can be ordered directly from the MPCA by contacting Jennifer Klang (jennifer.klang@pca.state.mn.us, 800-657-3864) or <http://www.pca.state.mn.us/water/clmp.html#signup>. As of 2-14-07, the cost of a Secchi disk is \$10.

To order a **2-meter integrated sampler**, check the appropriate box above. The cost of the 2-meter integrated sampler is \$30, which includes tax and shipping. The reason why this equipment is not included in the price of the monitoring program is that this equipment becomes the property of the client, whom is responsible for maintenance and care. All other supplies are the property of RMB Environmental and are returned at the end of the summer for off-season storage.
