Seasonal Surface Water Support - Tasks, 2021*

**There will be two interns to complete these tasks in 2021*

Main Tasks

1. Assist with lake monitoring program

- Assist with daily lake sample check-in to the laboratory
- Inventories: make sure there are always enough lake paperwork baggies stuffed, enough acid vials and enough clean amber bottles for big lakes days
- Online lakes monitoring results database data entry
- Quality control lake data in database
- Lake data graphing and analysis

2. Assist with lake and stream monitoring fieldwork

- Lake and stream on-site monitoring
- Canoe trips on river for hand-pulling Flowering Rush
- Zebra mussel veliger collection with plankton net
- Shoreline Inventories
- Any other misc. fieldwork

3. Assist with watershed coordinator tasks

- Lake and stream data entry
- Website maintenance

4. Assist with planting trees and plants in July

- Maintain/water trees upon delivery to RMB from nursery
- Deliver and plant trees around area lakes (200 trees)

5. Assist with aquatic plant surveys

- Learn aquatic plant identification
- Data entry and graphing after survey
- Assist with final report generation

6. Assist with social media updates

- Post pictures/updates to various social media platforms
